| 03 Live class | 09 Student space |
| 04 Students | 10 Federation dashboard |
| 05 Attendance | 11 Offline mode |
| 06 Payments | 12 Frequently asked questions |

1. Log in

Three types of accounts, each with its own tab on the login screen:

Teacher

Email and password. Manages their class day to day.

Student

An 8-character code, no email or password.

Federation

Email and password. Network overview.

GOOD TO KNOW

The student account is generated by the teacher from the student's profile, then shared via WhatsApp — see the "Students" section.

2. Teacher home

The first screen after logging in:

- Key figures — students, present, collected, unpaid
- Card **Live class**
- Today's timetable card
- Block **To do** (unpaid fees, attendance, memorization) surfaced automatically

3. Live class

The whole class on a single page, to open during the lesson.

Attendance and memorization

Present/Absent buttons and the next surah to validate, one tap each.

Live reading

- Type or paste a title and text (verse, fiqh excerpt, Arabic lesson...)
- Attach an image, a file, or record a voice message with the mic
- **Publish live** — instantly visible to all connected students

Live audio

Start audio broadcasts the teacher's mic (no video). Each student clicks **Join** to listen — browsers block autoplay.

RECOMMENDED USE

A single device placed in front of the class works just as well as one account per student.

4. Students

Button **+ Add a student**: name, Arabic name, age, parent — attached to the class right away.

On a student's profile: grid of the 114 surahs, message to the parent, payment collection, and the **Student access** block to create/regenerate their login code.

SECURITY

The student access code is shown only once. Write it down or send it right away via WhatsApp. If lost, regenerate a new one.

5. Attendance

Today's attendance, a Present/Absent button per student, with a bulk message to the parents of absent students.

6. Payments

- **Collect** → choose the operator (Orange Money, MTN Money, Wave) → Request payment → status "Pending"
- **Confirm receipt** once the money is received → receipt generated, status "Paid"
- The receipt can be sent to the parent via WhatsApp

GOOD TO KNOW

Requesting a payment requires an active connection. Confirming receipt also works offline.

7. Parents

WhatsApp messages to parents, from templates (absence, progress, receipt) or free text.

8. Subjects and timetable

Each class builds its curriculum from two subject families:

- **Quranic** — Quran, Tajwid, Tafsir, Hadith, Fiqh, Tawhid, Sira, Arabic grammar
- **National curriculum** — French, Math, English, World Discovery, Civics, Arts, PE

Then time slots (day, time, subject) make up the actual timetable.

9. Student space

Fully read-only: Quran progress, attendance for the month, monthly fee status, and the live reading/audio published by the teacher, tracked automatically.

10. Federation dashboard

- **Overview** — network indicators
- **Member schools** — list, integration status, detail
- **Advocacy** — PDF export for an integration file

11. Offline mode

Attendance, memorization, payment confirmation and messages work without network, synced once the connection is back.

EXCEPTION

Requesting a payment and starting live audio both require an active connection.

12. Frequently asked questions

The student code is lost

Student profile → Student access → Regenerate the code, then resend it via WhatsApp.

The mic isn't working

Check the microphone permission in the browser.

A student stays "Unpaid" despite having paid

Check whether the status is "Pending" — click Confirm receipt.

Nothing shows on the student side during the live session

Check on the teacher side that the status shows "Live".
